

invis is
the answer to a
straighter smile.

Invisalign® clear aligners are customised just for you. Speak to your Invisalign provider about straightening your smile with Invisalign's advanced technology.

 **invisalign®**

What is the **Invisalign system?**

The Invisalign system is a virtually invisible treatment that gently straightens your teeth. Through a series of custom-made, removable aligners made with our proprietary SmartForce™ technology, the Invisalign system gradually moves your teeth to an ideal position.

The advantages of Invisalign treatment.

- Invisalign clear aligners are removable, making it easier to brush and floss to help maintain your oral health during treatment.
- Attend functions and events in confidence with Invisalign clear aligners. Virtually invisible, very few people would notice you're having your teeth straightened.
- Get straighter teeth more predictably* and more comfortably** than ever before thanks to Invisalign's proprietary SmartTrack™ material.
- Invisalign aligners are suitable even for an active lifestyle since there are no metal brackets that risk cutting your mouth.
- With doctor visits only approximately every 6-8 weeks, Invisalign aligners are ideal even for a busy lifestyle, allowing you to spend more time doing the things that you love.
- Craving a snack? Since Invisalign aligners are easily removable, you have the freedom to eat, chew and drink whatever you like.

*Compared to Invisalign aligners previously made from single-layer (EX30) material.

**In a study by Miller et al, with adults measuring pain in the first week of treatment. Kevin Miller et al. "A comparison of treatment impacts between Invisalign aligner and fixed appliance therapy during the first week of treatment." American Journal of Orthodontics and Dentofacial Orthopedics. Volume 131, Issue 3, pp. 302.e1-302.e9, March 2007.

How does the Invisalign system work?

- 1** Using Align™ Technology's proprietary software, your doctor will create a customised 3D treatment plan. This will show you the final position your teeth are predicted to reach. This also informs you of the likely length of the treatment.
- 2** The customised aligners will be manufactured and shipped to your doctor's office.
- 3** Your series of custom-made aligners will be given to you by your doctor (typically 3-4 sets at a time) for you to wear every day, and change approximately every 1-2 weeks.
- 4** Monitor your progress on My Invisalign app, and visit your Invisalign trained doctor approximately every 6-8 weeks to monitor your progress, and receive the next series of aligners.
- 5** Congratulations! You have finished your Invisalign treatment! Maintain your newer, straighter smile with the use of Vivera™ retainers.

Treatable cases.

Invisalign clear aligners are clinically proven to treat cases from minor teeth straightening to moderate and severe malocclusions.

Gapped Teeth

This occurs when there is considerable space between at least two of your teeth, and can cause gum problems.

Crossbite

This can occur when the upper and lower jaws are both misaligned, and can cause wear and tear leading to bone loss.

Overbite

This occurs when the upper teeth bite over the lower teeth, and can lead to painful jaw irritation.

Underbite

This occurs when the lower teeth protrude past the front teeth, preventing normal function of your front teeth or molars.

Overcrowding

This occurs when there is simply a lack of room within your jaw for all your teeth to fit normally, leading to plaque accumulation.

Openbite

This is when your upper and lower teeth are unable to make physical contact when the jaws are closed, making chewing and even talking difficult.

My Invisalign app.

It has never been easier to stay on track.

Download from your favourite app store by scanning the QR code.

Monitor your aligner wear with the in-app time tracker.

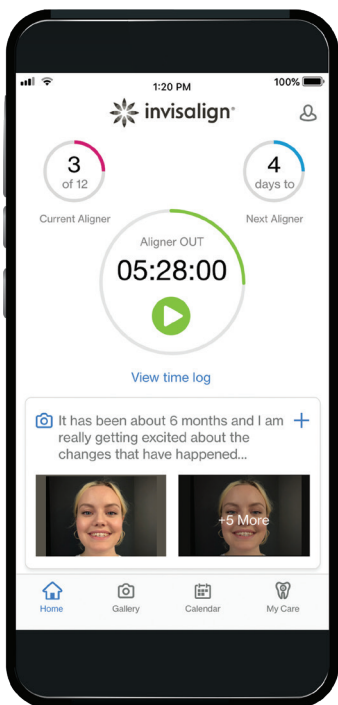

Personalise your appointment calendar and set up notifications.

Add photos to your Smile Gallery and view your progress.

Invisalign treatment is a series of clear plastic removable orthodontic aligners that gently move patients' teeth. An orthodontist or Invisalign trained dentist will be able to advise whether Invisalign treatment is right for you. Invisalign must be administered by a healthcare professional. You should always read and follow their directions for use.
